PROFESSIONAL SUMMARY

Curious engineer driven by the challenge of turning bold ideas into real, impactful products — blending code, design, and AI to craft experiences that feel futuristic, practical, and genuinely different from the ordinary. Constantly building, learning, and pushing boundaries beyond conventional development

EDUCATION

Bachelor of Technology (Artificial intelligence)	2024 - 2028
Newton School of Technology, Rishihood University	Grade: 6.8/10.0
Intermediate (Class XII)	2022 - 2023
Tagore Public School	Grade: 76.0%
Matriculation (Class X)	2020 - 2021
Tagore Public School	Grade: 80.0%

PROJECTS

Ember ([Github](#)) ([Demo](#)) March 2026

- **Ember** is a premium, real-time cafe management system built with the MERN stack and Socket.io. It features role-based dashboards to seamlessly connect cashiers, kitchen staff, and management. Live order tracking eliminates paper tickets, synchronizing the front-of-house with a dedicated Kitchen Display System. The application is wrapped in a highly polished, responsive, and dynamic light-themed user interface.

GriefCompanion ([Github](#)) ([Demo](#)) March 2026

- **Tech Stack:** React.js, Node.js, Express.js, Python, Flask, MongoDB Atlas, Groq API (LLaMA 3.1), ChromaDB, TF-IDF Retrieval, DistilBERT, HuggingFace Transformers, Clerk Authentication, Vercel, Render
- **Description:** An AI-powered emotional writing assistant that helps people compose the hardest messages of their lives — condolences, apologies, difficult news, and reconnections — through a premium, distraction-free interface backed by a full RAG pipeline and real-time LLM generation.
- **Features:** Secure user authentication using Clerk, AI-powered letter generation using Groq's LLaMA 3.1 with real-time token streaming via Server-Sent Events, Retrieval-Augmented Generation (RAG) pipeline using TF-IDF semantic search over a curated corpus of human-written letters, fine-tuned DistilBERT emotion classifier for auto-detecting message intent, multi-turn feedback and refinement loop allowing users to critique and regenerate drafts up to 3 times, tone A/B comparison generating two parallel variants using Promise.all, MongoDB Atlas persistence for draft history with soft-delete and edit tracking, admin analytics dashboard built on MongoDB aggregation pipelines visualised with Recharts, session auto-save restoring form state across browser refreshes, graceful degradation across all failure modes ensuring the app never crashes

•

habitflow ([Github](#)) ([Demo](#)) March 2026

- **Tech Stack:** React.js, Node.js, Express, MongoDB, Google Gemini AI, Zustand, JWT Authentication
- **Description:** An AI-powered habit tracking operating system designed to gamify personal growth through structured routines, rich analytics, and intelligent insights.
- **Features:** Secure custom JWT authentication, comprehensive habit tracking with category-based organization and visual analytics, gamified user progression including XP, leveling, and streak systems, a beautifully minimal and responsive UI featuring smooth micro-animations, and an integrated AI assistant powered by Google Gemini for personalized habit coaching and routine generation.

SKILLS

Computer Languages: TypeScript, NoSQL, HTML, CSS, JavaScript, Python, SQL

Software Packages: Pandas, Figma, Chart.js, Tailwind, Tailwind CSS, Prisma ORM, React, Node.js, Express JS, MySQL, MongoDB

Additional Courses: Data Structure

Soft Skills: Interpersonal communication, Written communication, Leadership, Team Building, Decision-making, Creativity, Teamwork, Critical Thinking, Openness, People skills, Communication Skills

Others: Git and Github, Postman, Product Management, Problem-Solving, OpenAI API, API testing, GitHub Actions, Three.js
